DeepSeek Harness Docker

English | 简体中文

这是一个可直接构建的 DeepSeek Harness 社区容器方案，默认运行官方 `@deepseek-ai/dsh` 的 Web UI。它不构建或修改 DeepSeek Harness 源码，只把官方 npm 发行物装入一个精简、非 root 的 Node.js 24 运行时。

> 当前基线：`@deepseek-ai/dsh@0.2.1-alpha.1`。DeepSeek Harness 仍处于预发布阶段；升级前应重新完成本文的构建和 Smoke Test。

`0.2.1-alpha.1` 直接对应官方 `dsh-v0.2.1-alpha.1` Release 与 npm Registry 的 `@deepseek-ai/dsh@0.2.1-alpha.1`，并非本项目自定义版本。本项目封装 npm 成品而不从源码构建，因此以可安装的官方发行物为基线，并故意不发布漂移的 Docker `latest` 标签。

上游已发布可安装的显式 npm 版本；Registry 镜像与 dist-tag 的更新可能短暂滞后，本项目始终固定完整版本，避免 dist-tag 漂移。`0.2.1-alpha.1` 新增实验性 Claude Code Mods 兼容层、Agent 辅助创建插件、预填草稿、Markdown frontmatter 预览、`--public-url` 和可选开发者工具组合包，并修复目标编辑、排队消息、工具输出、插件样式及依赖映射等问题。

> **升级提醒：** `0.1.7-alpha.1` 起 Session 日志为 V4。若从更早版本升级，必须先备份 `dsh-home`；依赖旧日志结构的工具需要适配 V4，降级前也应恢复升级前的卷备份，而不是让旧版直接读取已迁移数据。

> **兼容性提醒：** 自定义 `spill-policy` 配置必须把 `maxInlineBytes` 改为按估算 Token 计数的 `maxInlineTokens`。内置 E2B 执行后端已移除，PTC 与 Workflow 服务已重命名；若从 `0.1.7-alpha.1` 以前升级，还需处理 Messages-only adapter、Profile-owned 设置、Bundle Agent Preset 和 Remote `readBytes` 迁移。详见官方 Release。

> **0.2.1 兼容性提醒：** 自动化任务重新成为 Web 内置能力，旧实验组合包选择会自动清理但已有任务保留。运行时 invariant 插件及各包的 `./invariant` 导出已移除；子路径插件不再读取独立 `package.json`；输入区原 `stats` 扩展拆为 `activity` 与 `usage`。依赖这些入口的自定义插件必须先适配。

> 上游版本跟踪：每日运行的 Upstream DSH version watch 会同时检查 GitHub Release 与 npm。若新版 Release 已发布但 npm 制品尚不可用，工作流会创建或刷新等待 Issue 并保留当前可安装基线；同版本 npm 包可安装后，Issue 会自动切换为升级提醒，固定版本追平后再自动关闭。

D Annotation Examples

In this section, we present 6 annotation examples that illustrate typical multimodal reasoning and integration patterns, which help clarify the construction and use of MMDocRAG. Each annotation includes the following components: question, short answer, a set of noisy image and text quotes, gold quotes, and the final multimodal answer. These examples frequently require reasoning across multiple pages and modalities. The image quotes encompass diverse formats such as figures, charts, tables, and infographics, highlighting the complexity and richness of the multimodal reasoning tasks.

Question:
What percentage of the second largest demographic segment of respondents reported not conducting promotions to customers over Wi-Fi in 2015?

Short answer: 85%

Gold quotes: ['image1', 'image4']

Multimodal answer:
The question asks for the percentage of respondents from the second largest demographic segment who reported not conducting promotions to customers over Wi-Fi in 2015.
To determine this, we need to analyze the data provided in the figures:

1. **Figure 1**: This figure shows the segments of respondents by their industry segment. The segments are:
   - General Merchandise & Specialty: 63%
   - Hospitality: 23%
   - Food, Drug, Conv, Mass: 14%

   From this information, the second largest segment is "Hospitality" at 23%
2. **Figure 2**: This figure provides insights into the responses categorized as "Yes" or "No" for conducting promotions over Wi-Fi. For the Hospitality segment:
   - Yes: 15%
   - No: 85%

Combining this information, the second largest demographic segment (Hospitality) reported that 85% of respondents did not conduct promotions to customers over Wi-Fi in 2015. This matches the short answer provided.
